

Red Hill Country Club

Located beneath the beautiful foothills of the San Gabriel Mountains in the city of Rancho Cucamonga, Red Hill Country Club delights its members and guests with glorious views and immaculate sunsets. A private member-owned club, Red Hill Country Club was established in 1921. From the minds of legendary golf course architects George C. Thomas and William (Billy) P. Bell, Red Hill is a high risk/high rewards course sure to delight and inspire golfers of all abilities. Red Hill golf course is the older brother to other great Southern California clubs designed by Thomas—Los Angeles, Riviera, and Bel Air Country Clubs.

Sponsor Brochure

Tournament proceeds will benefit the OPARC Speech Pathology Program

A significant number of OPARC clients experience either partial or total inability to communicate verbally. Communication is an essential part of living, making possible the expression of desires, the sharing of emotions, and the transmission of vital information regarding health and other personal conditions. Unless mitigated by other communication methodologies, this disability materially detracts from the quality of life.

The goal of this program is to enhance the communication abilities of clients to “normalize” their lives as much as possible. Clients who participate in this program will be able to take part in all kinds of activities common to all people, including working and socializing with friends.

It is our goal to make speech pathology services available to as many clients as possible, given our financial capacity.

“I believe in teaching each individual to communicate in the most effective way possible, whether it be through singing, gestures, words, or using augmentative communication devices.”

*Joyce Corjon,
Speech Pathologist*
